

The Summit Excellence Framework

ASK YOUR OPERATIONS A QUESTION. GET AN ANSWER TRACED THROUGH THE GRAPH.

Most operational knowledge lives in spreadsheets, inboxes, and people's heads. When a KPI turns red, the first step is usually a meeting just to find out why. Summit turns that knowledge into **one connected model of your business** — then gives your team a way to ask it questions and get real answers, on the spot.

TWO WAYS TO PUT IT TO WORK

01

Value Mapping for AI

Operational Blueprint → Semantic Model → Business Insights

See exactly how your business creates value — every segment, critical process, product, and KPI, mapped and connected in one explorer your whole team can navigate.

- One shared picture of the business
- Trace any KPI straight back to the process
- Scalable with your business

02

Annie & Archie

Plain-English Questions → Answers & Insights Instantly

Two AI agents built on your Operational Blueprint — trace root-cause, downstream-impact, KPI-gaps, and kaizen opportunities, and get answers you can trust.

Annie
CI ARCHITECT

Answers your everyday questions — traced through the graph, not guessed at.

Archie
AI ARCHITECT

Keeps your Operational Blueprint current as your organization evolves.

HOW IT WORKS

01

ALIGN & SCOPE

Define segments and scope together before mapping begins.

02

MAP & BUILD

Your intake workbook becomes a knowledge graph and interactive explorer.

03

PUT IT TO WORK

Annie and Archie go live on your Operational Blueprint, ready for questions.

ALSO AVAILABLE

5 Why Agent

\$399 - Flat Fee

A guided root-cause facilitator, trained for Manufacturing. Sold on its own — no engagement required.

AI Agent Training

By Program

Four hands-on modules for teams building their own AI solutions in-house — from problem framing to a working, monitored solution.
